Thoughts on a good answer to this?

Subject: Food insufficiency and SNAP

Stacy,

Good to talk today--tx. I meant to ask you:

Angela Rachidi cites Pulse data showing that 3/4s of people reporting food insufficiency do not get SNAP. Therefore, she argues, a SNAP benefit increase is an inefficient way to address food insufficiency.

Wondering what your thoughts are on that?

We can discuss in a final fact-check call if you prefer, but I'm curious if you have an easily expressed thought or two. How will a SNAP increase help?

Tx.

JD
